PROJECTS

[CATERING RESERVATION SYSTEM](#)

- HTML, CSS, JavaScript, FireBase || Visual Studio
- This project is basically made with the help of Html, Css and JavaScript with help of FireBase Data storage in which an online Catering Reservation System is made for the User and the Admin.

UNIVERSITY MANAGEMENT SYSTEM

- HTML, CSS, JavaScript, Java, Servlet, JSP, Oracle DB || Eclipse IDE
- Created an entire University Management System with three different sides (Student, Teacher, and Admin) side where the people of a university can easily register student or teacher, and teacher can easily see or update profile or add student marks which the student can easily see from their own profile after visiting.
